DATA ANALYSIS PROJECT

SUPERETORE DATASET

ALABI NASROH

KEY INSIGHTS FROM THE PYTHON ANALYSIS:

- Profit is highly concentrated
- The top 20% of customers contribute 81.43% of total profit. The business is heavily dependent on a small group of high-value customers.
- Margins differ significantly by category
- Technology at 17.4% and Office Supplies at 17.0% are the most profitable categories. Furniture has the lowest margin at 2.5%, meaning high sales but low profitability.
- Growth is stagnant and losses exist in product line
- Year-over-year sales growth is only 0.67%. Several products, especially in 3D Printers and Printers, are generating losses over -3.8K to -8.8K, which drag down overall profit of 286,397.

DATA-DRIVEN BUSINESS RECOMMENDATIONS

- Protect and grow top customers

Implement a loyalty/VIP program for the top 20% customers. Assign dedicated account managers and offer bundled offers to increase retention and lifetime value.

- Rebalance product and category focus

Increase investment in Technology and Office Supplies due to high margins. Review pricing and supply costs for Furniture to improve its 2.5% margin.

- Eliminate or reprice loss-making products

Discontinue or reprice the bottom 5 loss-making products like Cubify CubeX 3D Printer. Replace them with higher-margin alternatives to protect profitability
